

LCN 6400 Series COMPACT™ automatic operator

Application

LOW / MEDIUM TRAFFIC

SINGLE DOORS

4040XP RETROFIT

Needs

Usage of low energy automatic operators continues to increase in response to heightened needs for accessible and touchless solutions.

TOUCHLESS ACCESS

- Protect the health and well-being of building occupants while safely reopening facility
- Implement CDC recommendations, such as the removal of high touch surfaces to mitigate risks

ACCESSIBILITY

- Meet ADA requirements for opening force, closing speed and maneuvering clearances
- Go beyond minimum requirements to elevate the experience for those with disabilities

76% surveyed have a COVID committee that leads risk assessment and mitigation efforts¹

37% surveyed added automatic operators to interior openings in the past 12 months to support ADA compliance¹

1. Allegion primary research, December 2020.

Solution

The LCN COMPACT operator was designed to make it easy to upgrade an opening for ADA compliance or touchless operation. It is the first of its kind to retrofit onto an existing mechanical closer.

SIMPLE

Module connects to mechanical closer with a mounting plate and just 4 screws

COST EFFECTIVE

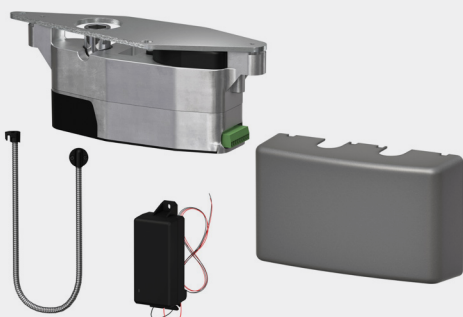

Modular design enables reuse of existing closer and reduces install time

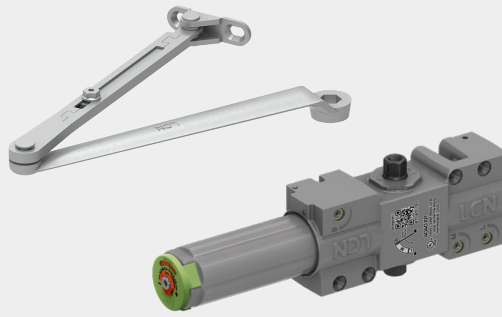

TRUSTED PERFORMANCE

Leverages industry leading LCN 4040XP mechanical closer
